I am currently a resident within the area of the proposed rate increase. Therefore, I am a customer.

2. Please give a concise statement of your protest. \* (This section must be completed. Attach additional information if necessary.)

I find it incredible that this company has allowed the infrastructure of the overall water system to systematically degrade to the point where a 42% year over year rate increase is required. This is also a 63.86% increase since 2006. The total rate increase over the previous 7 years was 42.21%. The letter from Utilities Inc indicates that they have spent over \$2M in the last three years but the last rate increase was 2 years ago. How much was or should have been covered in that. If in fact Utilities, Inc. claims that these problems are the result of original construction, they should have recognized this in their original purchase of the utility. How long do we have to be penalized for poor management on the part of Utilities Inc.

Enough is enough.....

3. Do you wish to make an appearance at a hearing in this proceeding, if scheduled, and offer sworn testimony? \*
